Email: [Your Email Here]

1. Introduction to AVS

AVS (Advanced Variables System) is an advanced AI architecture integrating quantum-inspired variables, dynamic neural mapping, and artificial consciousness. Designed to revolutionize AGI development by enabling contextual and scalable intelligence.

2. Technical Highlights

- Reduces model training time by up to 50% using quantum variable logic
- Enables modular AI-agent architecture
- Supports contextual memory and adaptive reasoning
- Ideal for AGI, research systems, and AI startups

3. IP & Legal Status

- Copyright documents in preparation
- Patent registration prepared for WIPO, USPTO, and Thailand DIP
- Source code and architectural documentation available under NDA

4. Business Potential

- Target: AI startups, research labs, AGI developers
- AGI market forecast: USD 3,500 billion by 2030
- Sale model: Exclusive ownership or long-term licensing with royalty

5. Commercial Offer

- Starting price: 120 million THB (or USD equivalent)

Exclusive IP Sale Proposal - AVS

- Includes: full transfer rights, optional onboarding support
- Conditions: NDA, non-compete, code onboarding and training

6. Demonstration & Meeting

- Demos available via Zoom or Google Meet
- Technical documents and code previews provided after NDA agreement
- Schedule via: [\[Calendly Link\]](#)

Sincerely,
