

Scalable AI LLM System - Intellectual Property Sale

1. What is for Sale?

- Full IP ownership and patent rights to a scalable AI system capable of orchestrating 1,000,000 LLMs.
- Source code for LLM orchestration system, API gateway, persona engine, memory synthesis.
- Patent documents filed in Thailand, US, EU, and PCT (international).
- Use cases in AI SaaS, defense AI, virtual labs, simulation systems.

2. Key Technical Features

- Scalable deployment of 1M LLMs with modular architecture.
- Emotional-behavioral logic routing & synthetic ensemble memory layers.
- Federated decentralized training protocols with trust ranking.
- API-based access layer with personality-based logic routing.
- Multi-cloud deployment with GPU optimization.

3. Patent Family

- Thailand National Filing No: TNP-2025-071
- PCT Reference: PCT/TH2025/000123
- U.S. Provisional: 63/999,456
- EPO Filing: EP-42890476.6

4. Monetization Potential

- Estimated annual revenue via SaaS deployment: \$10M to \$100M.
- Licensing to AI companies/governments: \$2M to \$20M per license.
- Strategic acquisition potential: \$15M to \$50M total valuation.

5. Sale Terms

- Full and exclusive ownership transfer.
- Includes source code, technical documentation, IP filings.
- Asking price: \$25,000,000 (negotiable).
- Contact: contact@llmscale.ai
- Legal Rep: AI IP Legal Group, Singapore
